

TECHNICAL PROPOSAL

FGI Digital Ecosystem

Website, Membership Platform & Digital Community

PREPARED FOR

DATE

PREPARED BY

Fashion Group International

June 25, 2026

Dynamicflow

01

Executive Summary

A modern, headless architecture delivering a premium editorial experience worthy of a 95-year-old fashion institution.

Fashion-Forward Website

Visually stunning design reflecting FGI's prestige in the fashion, beauty & creative industries.

Unified Membership

9 membership tiers with automated workflows, renewals, invoicing & role-based access.

Events Engine

Smart pricing, sponsorship tools, QR ticketing & attendance analytics — fully integrated.

Student Ecosystem

Club management with graduation-to-professional transition automation.

Governance Portal

Board, regional directors & HQ workspace with compliance tracking and deadline management.

Enterprise Analytics

Real-time KPI dashboards across membership, events, revenue & regional participation.

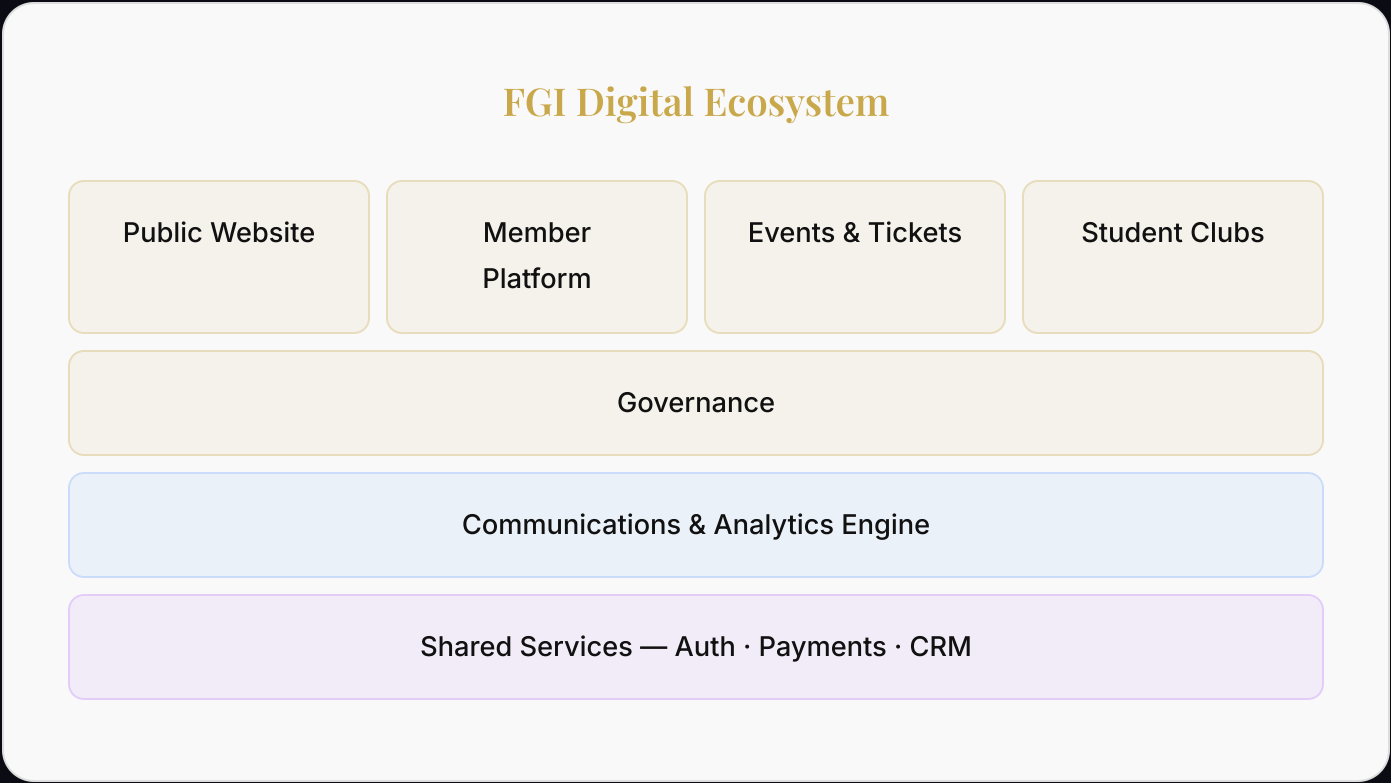

Key Architectural Decisions

DECISION	RATIONALE
Next.js 15	SSR for SEO, React Server Components for performance, image optimization for media-heavy content
Strapi 5 CMS	Open-source, self-hosted, no per-seat fees — nonprofit-friendly
NestJS API	Type-safe, modular back-end aligned across full TypeScript stack
PostgreSQL + Redis	Relational integrity for membership data, Redis for session caching
Stripe Connect	PCI-DSS Level 1 compliant; memberships, events, invoicing, recurring billing
HubSpot CRM	Free tier for nonprofits; native email marketing & segmentation

DECISION	RATIONALE
AWS Cloud	SOC 2 compliant; scales from current traffic to 10× without re-architecture

Understanding of Requirements

Seven functional domains, fully mapped to your RFP.

Requirements Traceability Matrix

RFP REQUIREMENT	PROPOSED SOLUTION	MODULE
Visually sophisticated design	Next.js + Framer Motion + custom design system	Website
Mobile-responsive, ADA compliant	Responsive CSS + WCAG 2.1 AA audit	Website
SEO optimized	SSR + structured data + sitemap generation	Website

RFP REQUIREMENT	PROPOSED SOLUTION	MODULE
Video/media integration	Cloudinary CDN + embedded video players	Website
14 public pages + regional directory	Next.js dynamic pages + Strapi collections	Website
Online membership applications	Multi-step forms with approval workflows	Membership
9 membership levels with RBAC	Role-based middleware + permission matrix	Membership
Payment processing	Stripe Connect + Stripe Billing	Membership
Automated reminders & renewals	NestJS cron jobs + email triggers	Membership
Searchable member directory	Elasticsearch with privacy controls	Portal
Role-based dashboards	Custom React dashboards per tier	Portal
Event registration with smart pricing	Membership-aware pricing engine	Events
Student club management	Club registration + advisor workflows	Student
Governance documents	Versioned repository + submission tracking	Governance
Targeted email/newsletters	HubSpot integration with segment sync	Comms
PCI-compliant payments	Stripe (PCI-DSS Level 1)	Security
SSO & API integration	NextAuth.js + OAuth 2.0 / SAML	Security
GDPR & privacy compliance	Consent management + data deletion APIs	Security

Recommended Technology Stack

Full-stack TypeScript — one language, one team, database to UI.

Front-End

- Next.js 15
- React 19
- TypeScript 5
- Framer Motion
- Radix UI
- CSS Modules
- React Hook Form
- TanStack Query
- Recharts

Back-End / API

- NestJS 11
- Prisma 6
- TypeScript 5
- Bull MQ
- Passport.js
- NextAuth
- Nodemailer
- PDFKit

Content Management

- Strapi 5
- Cloudinary
- Strapi RBAC
- REST + GraphQL

Data Layer

- PostgreSQL 16
- Redis 7
- Elasticsearch 8
- Cloudinary CDN

Infrastructure & DevOps

AWS ECS Fargate

AWS RDS

ElastiCache

S3 + CloudFront

AWS SES

Docker

GitHub Actions

Terraform

Sentry

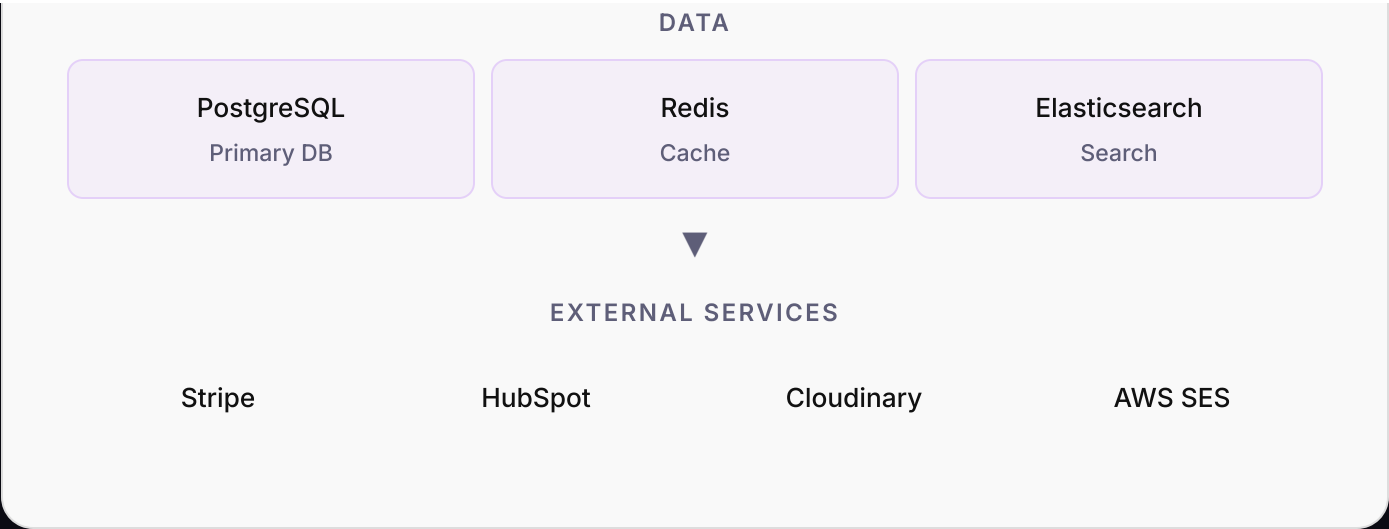

Why Next.js over WordPress / Drupal?

- Fashion-forward sites demand **pixel-perfect design control** — template themes cannot deliver this.
- SSR ensures Google indexes all content while delivering **sub-second page loads**.
- React components enable **reusable patterns** across 14+ public pages and member portals.
- Automatic image optimization (`next/image`) serves WebP/AVIF — critical for media-heavy content.

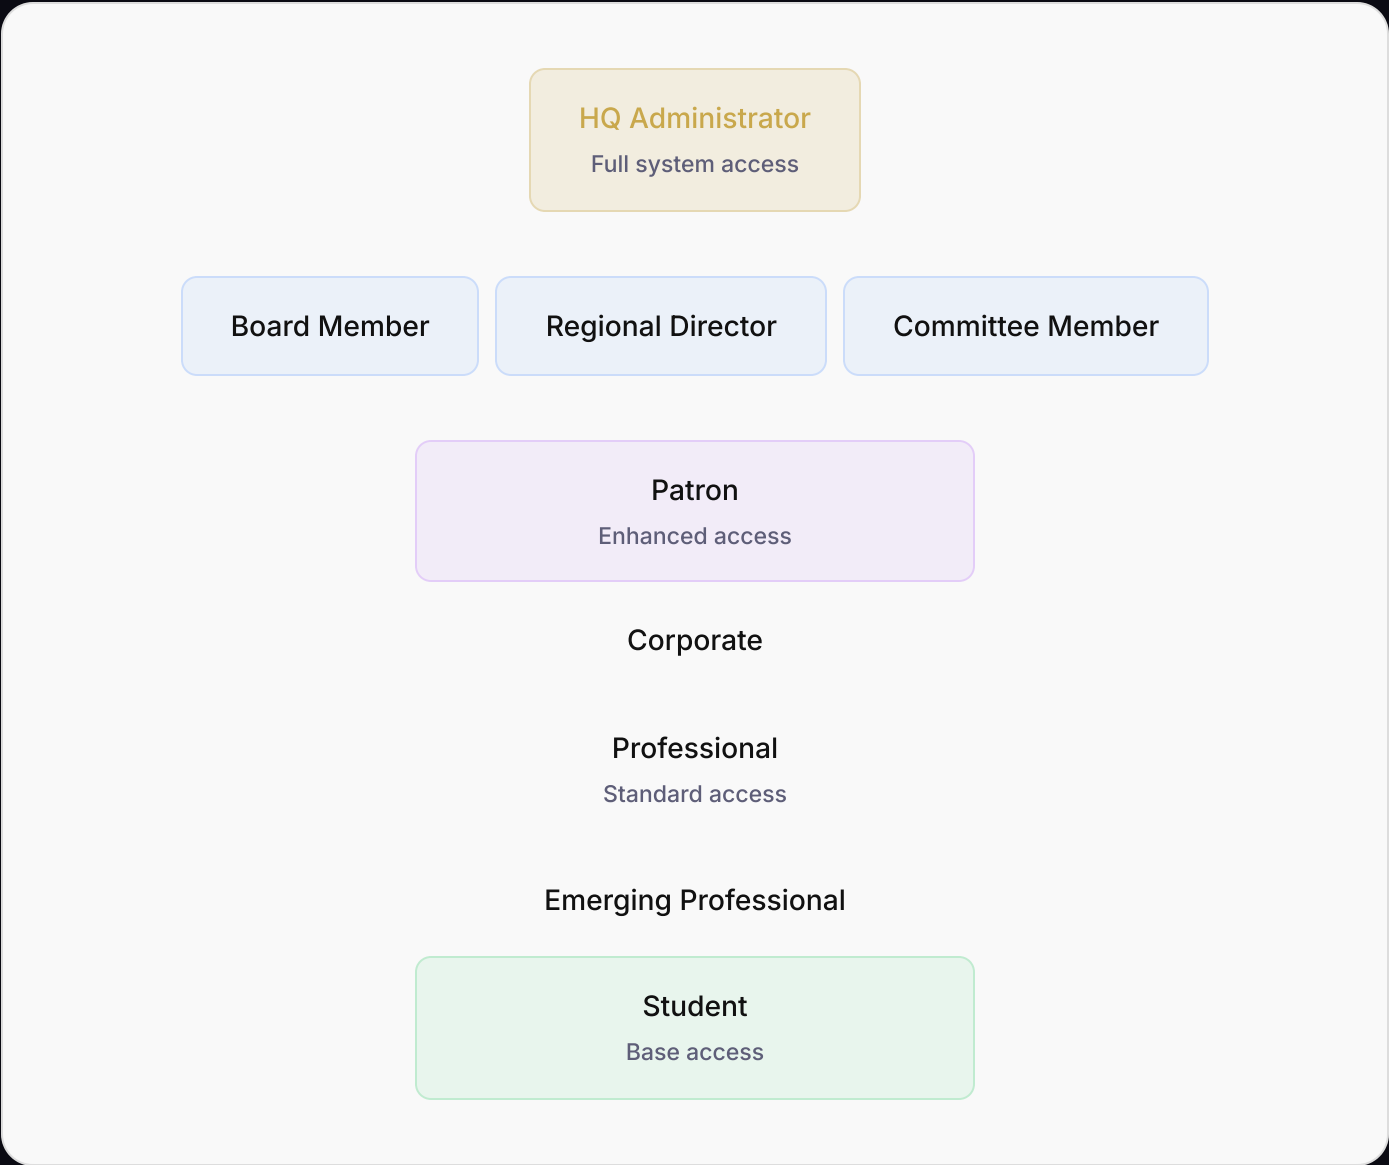

System Architecture

Headless architecture with modular, domain-driven API design.

Role-Based Access Control (RBAC)

Payment Architecture

Member Portal

Checkout (Next.js)

Stripe Connect

Webhooks (NestJS)

✓ Update Status

✓ Generate Invoice

✓ Send Receipt

Recurring billing — Stripe Subscriptions with auto-renewal

One-time payments — Event tickets, donations, sponsorships

Smart pricing — Auto member/non-member pricing

Membership upsell — "Save \$X by joining" at checkout

Automated invoicing — PDF with FGI branding

Refunds & credits — Admin panel for partial/full refunds

05

CRM Recommendation

HubSpot Nonprofit Edition — powerful, cost-effective, and built for organizations like FGI.

HubSpot CRM Benefits

- ✓ **Free CRM Core** — unlimited contacts, no per-seat cost
- ✓ **Nonprofit Discount** — 40% off paid hubs
- ✓ **Email Marketing** — drag-and-drop builder, A/B testing
- ✓ **Contact Segmentation** — by tier, region, committee, student status
- ✓ **Workflow Automation** — renewals, welcome sequences, re-engagement
- ✓ **API Integration** — bi-directional sync via HubSpot API v3

Integration Flow

1. New Member Created

FGI Back-End (NestJS)

↓ Webhook Sync

2. Contact Created + Tagged

HubSpot CRM

↓ Workflow Trigger

3. Welcome Email Series

30-day onboarding sequence

Why not Salesforce?

Salesforce Nonprofit Cloud is \$36–\$100/user/month, requires certified admins, and has a steeper learning curve. For FGI's scale, HubSpot delivers equivalent functionality at a fraction of the cost.

Module Implementation

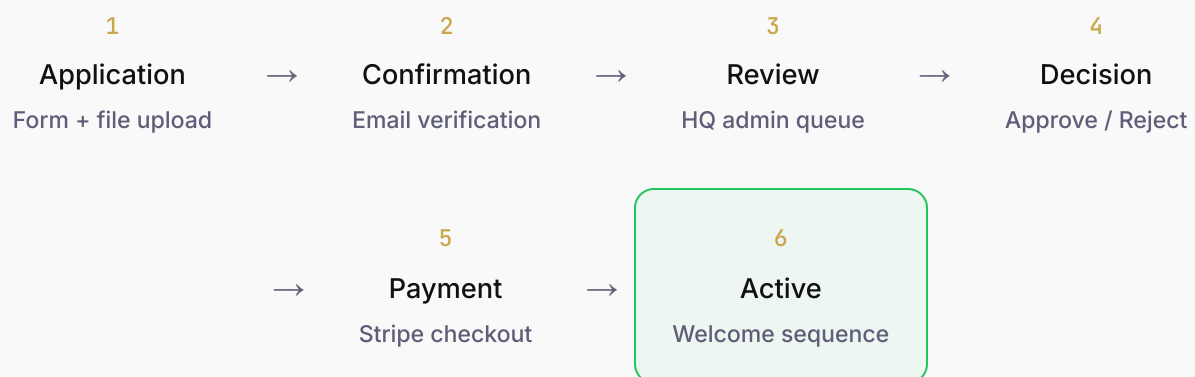

Detailed plan for each of the seven functional domains.

Public Website — 15 Pages

Home	About FGI	Mission & Impact
Hero video, events, news, membership CTA	Mission history, timeline, impact	Annual highlights, infographics
Leadership	Membership	Events
Photo grid, bios, committees	Tier comparison, benefits, apply	Calendar + list view, archives
News & Press	Awards	Scholarships
Blog feed, categories, search	Descriptions, past winners, nominate	Eligibility, apply, stories
Education	Student Programs	Resources
Courses, webinars, resources	Club directory, how to start	Reports, publications (gated)
Sponsors	Contact	Regional
Logo wall, tiers, inquiry form	Form, locations, social links	Unified directory with map

- Custom design system with FGI brand tokens as CSS custom properties
- Micro-animations on scroll via Framer Motion
- Magazine-style layouts reflecting fashion industry aesthetics
- WCAG 2.1 AA accessibility with axe-core in CI pipeline

Membership Management

- ▶ Multi-step application form with document uploads
- ▶ Automated email confirmation and email verification process
- ▶ Admin approval queue with bulk actions
- ▶ Configurable tiers — HQ admins add new tiers without developers
- ▶ Renewal pipeline: 90/60/30/7-day reminders → auto-charge → grace → lapse
- ▶ Full membership history log with timestamps and actors

Member Portal — Role-Based Dashboards

WIDGET	STUDENT	PROFESSIONAL	CORPORATE	BOARD	HQ ADMIN
Profile completion	✓	✓	✓	✓	✓
Upcoming events	✓	✓	✓	✓	✓
Renewal status	✓	✓	✓	✓	✓
Exclusive content	—	✓	✓	✓	✓
Industry reports	—	—	✓	✓	✓
Committee tools	—	—	—	✓	✓
Governance docs	—	—	—	✓	✓
System admin	—	—	—	—	✓
Analytics dashboard	—	—	—	✓	✓
Member directory	✓	✓	✓	✓	✓

Events & Registration

- ▶ **Event creation:** Rich text, multiple ticket types, sponsor slots, capacity limits
- ▶ **Smart pricing:** Middleware auto-detects membership → applies correct tier price
- ▶ **Checkout upsell:** Non-members see "Join FGI and save \$X" with membership add-to-cart
- ▶ **QR ticketing:** PDF tickets with unique QR codes for check-in
- ▶ **Attendance tracking:** QR scan → record → post-event follow-up email
- ▶ **Reporting:** Per-event P&L, demographics, sponsor ROI

Student Club Platform

- ▶ **School application:** Faculty advisor submits registration with institution details
- ▶ **Club dashboard:** Student officers manage events, communications, roster
- ▶ **Graduation trigger:** Auto email series offering professional tier at discounted rate
- ▶ **Mentorship matching:** Students browse professionals who opted in as mentors

Governance & Leadership Portal

- ▶ **Document repository:** Version-controlled policies, manuals, templates, branding
- ▶ **Submission workflows:** Regional directors submit → HQ reviews → approves/returns
- ▶ **Deadline tracker:** Calendar with status indicators (submitted, overdue, pending)
- ▶ **Compliance dashboard:** At-a-glance regional status, outstanding items, escalation alerts

Communications & Analytics

DASHBOARD	AUDIENCE	KEY METRICS
Executive	CEO, Board	Total members, revenue, YoY growth, retention
Membership	HQ Admin	Apps, approvals, renewals, lapses, tier distribution
Events	Events Team	Registrations, attendance, revenue, sponsor ROI
Regional	Regional Directors	Membership count, participation, compliance
Student	Student Programs	Club count, transitions, mentor matches
Financial	Finance/Board	Revenue, MRR, payment failures, outstanding invoices

07

Development Timeline

12 months, 6 phases — from discovery to go-live.

1 Months 1-2

Discovery & Design

- Stakeholder interviews (CEO, board, regional directors)
- Information architecture, sitemap & user flows
- UX wireframes for all pages & portals
- Visual design — 3 homepage concepts + key page mockups
- Technical architecture document finalized

✦ Milestone: Design Approval

2 Months 3-4

Core Platform

- Project scaffolding (Next.js, NestJS, Strapi, DB)
- Authentication & RBAC system
- Database schema & Prisma migrations
- CMS setup (Strapi collections, roles, media)
- Design system implementation
- CI/CD pipeline & staging environment

3 Months 5-6

Membership & Portal

- Application & approval workflows
- Stripe integration (payments, subscriptions)
- Member portal (dashboard, profile, renewals)
- Member directory (Elasticsearch, privacy controls)

4 Months 7–8

Events & Student Platform

- Event creation & management (admin)
- Registration, ticketing & smart pricing
- Student club registration & management
- Student-to-professional transition automation
- Attendance tracking & event reporting

5 Months 9–10

Governance & Communications

- Governance document repository
- Submission workflows & compliance tracking
- HubSpot CRM integration & email segmentation
- Newsletter templates & automation workflows

6 Months 11–12

Analytics, QA & Launch

- Metabase dashboards (6 views)

- Security audit & penetration testing
- Accessibility audit (WCAG 2.1 AA)
- Performance optimization & load testing
- User acceptance testing (UAT)
- Staff training (7 sessions)
- Data migration & go-live

Milestone: Go-Live

08

Project Team

8.5 dedicated professionals across 12 months.

Project Manager

1

Timeline, budget, stakeholder communication, risk management

UX/UI Designer

1

Research, wireframes, visual design, design system, accessibility

Sr. Front-End Dev

1

Next.js, React components, design system implementation

Front-End Dev

1

Portal dashboards, forms, member directory UI

Sr. Back-End Dev

1

NestJS API, database architecture, auth, payments

Back-End Dev

1

Events, student platform, governance workflows

CMS / Integration

1

Strapi, HubSpot, Elasticsearch, data migration

QA Engineer

1

Test planning, automated testing, security & accessibility audits

DevOps Engineer

0.5

AWS infrastructure, CI/CD, monitoring, deployment

Training Plan

7 tailored sessions plus ongoing resources.

SESSION	AUDIENCE	DURATION	TOPICS
CMS Content	HQ editors, regional directors	4 hrs	Pages, media, publishing workflows
Membership Admin	HQ membership admin	4 hrs	Applications, tiers, payments, reports
Events	Events team	3 hrs	Events, pricing, tickets, sponsors
Analytics	CEO, board, regional	2 hrs	Dashboards, reports, data export
Student Clubs	Student programs coord.	2 hrs	Approvals, advisors, transitions
Governance	Regional directors, board	2 hrs	Documents, submissions, compliance
System Admin	HQ IT admin	3 hrs	Users, RBAC, API keys, monitoring

Video recordings of all sessions

Written guides with screenshots

Quick-reference cards (1-page PDFs)

Sandbox environment for practice

10

Ongoing Support & Maintenance

99.9% SLA with tiered response times.

CRITICAL

Site Down

1 hour

24/7 • Immediate incident response

HIGH

Feature Broken

4 hours

Business hours • Bug diagnosis & fix

MEDIUM

Minor Issue

1 day

Business hours • Non-blocking fixes

LOW

Enhancement

3 days

Business hours • Scoping & backlog

Monthly Maintenance Includes

Security updates & dependency patching

99.9% SLA with automated alerting

Daily backups with 30-day retention

Monthly performance reports

CMS & plugin updates

Auto SSL certificate renewal

10 hrs/month included support

Annual pentest & accessibility re-audit

Cost Proposal

Transparent pricing with no hidden fees.

TOTAL IMPLEMENTATION

\$245,000

12-month development

ANNUAL MAINTENANCE

\$47,900

Hosting + Support

Implementation Breakdown

PHASE	DURATION	COST (USD)
Phase 1: Discovery & Design	2 months	\$28,000
Phase 2: Core Platform	2 months	\$42,000
Phase 3: Membership & Portal	2 months	\$48,000
Phase 4: Events & Student Platform	2 months	\$44,000

PHASE	DURATION	COST (USD)
Phase 5: Governance & Communications	2 months	\$38,000
Phase 6: Analytics, QA & Launch	2 months	\$32,000
Subtotal: Development	12 months	\$232,000
Data Migration	—	\$8,000
Training (7 sessions)	—	\$5,000
Total Implementation		\$245,000

Annual Maintenance & Hosting

ITEM	ANNUAL COST (USD)
AWS Infrastructure	\$9,600
Cloudinary (Media CDN)	\$2,700
Elasticsearch (OpenSearch)	\$3,600
HubSpot CRM (Nonprofit)	\$5,400
Sentry (Error Monitoring)	\$1,200
Domain & SSL	\$200
Monitoring & Security Tools	\$1,200
Subtotal: Hosting & Services	\$23,900
Support & Maintenance (120 hrs/yr)	\$24,000

ITEM	ANNUAL COST (USD)
Total Annual Cost	\$47,900

Cost Notes

- All prices are estimates, finalized after the Discovery phase.
- Stripe transaction fees (2.9% + \$0.30) are pass-through, not included above.
- HubSpot pricing assumes 40% nonprofit discount.
- 10 monthly support hours can be banked up to 30 hours.

Security & Compliance

Enterprise-grade security with GDPR, PCI, and ADA compliance.

Encryption

AES-256 at rest, TLS 1.3 in transit

Authentication

NextAuth.js, bcrypt, MFA support

Authorization

JWT-based RBAC, NestJS guards

PCI Compliance

Stripe Elements — card data never touches FGI servers

EU

GDPR

Consent management, data export, right to deletion

WAF & DDoS

AWS WAF (OWASP Top 10) + Shield Standard

Secrets

AWS Secrets Manager for API keys & credentials

Scanning

Dependabot + Snyk automated vulnerability scanning

Penetration Test

Annual third-party pentest

Backup

Daily automated, 30-day retention, tested recovery

Audit Logging

All admin actions with actor, timestamp, change detail

Privacy

Cookie consent, profile privacy settings, DPAs with vendors

13

Why Dynamicflow

The right partner for FGI's digital transformation.

01

Full-Stack TypeScript

One language, one team, from database to UI. No translation gaps between front-end and back-end.

02

Nonprofit Expertise

We understand tiered memberships, board governance, volunteer management, and limited IT budgets.

03

Fashion Industry Fit

For FGI, the website IS the brand. We design to fashion industry standards, not generic corporate templates.

04

Future-Proof Architecture

Headless approach means FGI can add a mobile app or redesign the front-end without rebuilding the back-end.

05

Transparent Process

Bi-weekly demos, shared project board, dedicated Slack channel, and no surprises on timeline or budget.

06

Cost-Effective

Open-source stack (Strapi, Metabase, NestJS) eliminates recurring license fees enterprise CMS platforms charge.

Dynamicflow

Building Digital Ecosystems for Impact Organizations
